Resolution Verification (simulated)

- Emergency fix deployed by Dev Team
- Exam submission tested successfully
- No new errors observed during short-term monitoring

Resolution notification sent to stakeholders.

D **Duonghb1577@gmail.com** 5:02 PM
Verification (simulated)

- Test submission completed successfully
- WEB102-HN: Passed
- DATA101-SG: Passed
- MOBILE201-HN: Passed
- No new submission errors observed during short-term monitoring

D **Duonghb1577@gmail.com** 5:02 PM
Dev Team Update (training simulation)

Dev Team deployed an emergency fix for the database connection issue.

Next action:
- Verify exam submission
- Test across multiple affected classes
- Monitor for recurrence

D **Duonghb1577@gmail.com** 4:57 PM
Operations Manager Update

Current impact:
- 50+ students across multiple classes cannot submit final exams
- Failure rate is currently 100%
- Exams are ongoing, so the business impact is critical

Current action:
- Dev Team and engineers have been escalated
- Investigation is focused on database/backend failures

Options:
1. Emergency fix / rollback
  - Pros: fastest path to restore service
  - Cons: may require temporary rollback of recent changes

2. Temporary submission workaround
  - Pros: students can continue submitting exams
  - Cons: manual processing may be required later

Next update:
We will provide another status update within 15 minutes.

Immediate Dev Alert

Channel: Microsoft Teams

🚨 EXPEDITE - Exam Submission System DOWN 🚨

Impact:
- 50+ students affected
- Multiple classes impacted
- Final exam submission unavailable
- Failure rate: 100%

Error:

"System error - please contact administrator"

Current status:
- Incident started approximately 30 minutes ago
- System-wide issue suspected

Request:
Immediate investigation and emergency mitigation required.

Ticket: #00008

D **Duonghb1577@gmail.com** 4:49 PM
Diagnosis (simulated)

Incident scope:
- System-wide exam submission failure
- 50+ students affected across multiple classes
- Failure rate: 100%
- Incident started approximately 30 minutes ago

Monitoring findings:
- Azure App Insights shows a spike in exceptions
- Database connection errors detected

Application logs:
- Database timeout errors
- Submissions cannot be saved

Assessment:
This is a system-wide backend/database incident.
Immediate Dev Team involvement is required.

Potential mitigation:
- Revert the latest code change
- Redeploy/release to allow the database connection to recover
